2011	The 10th POSTECH-KAIST Science War, Daejeon, Korea

Open Source Projects

5.1 Owned

whiteglass https://github.com/yous/whiteglass
  Minimal, responsive Jekyll theme for hackers.

vim-open-color https://github.com/yous/vim-open-color

Vim color scheme using Open Color.

Arcus Docker `https://github.com/yous/arcus-docker`
Docker for Arcus Cache Cloud.

TweetDeck Image Extension `https://github.com/yous/tweetdeck_image_extension`
Support additional image preview for TweetDeck.

homebrew-fadedrubies `https://github.com/yous/homebrew-fadedrubies`
Old Ruby formulae for the Homebrew package manager.

vanilli.sh `https://github.com/yous/vanilli.sh`
A lightweight start point of shell configuration.

Pinpoint Docker `https://github.com/yous/pinpoint-docker`
Docker for Pinpoint.

BaseHangul `https://github.com/yous/basehangul`
Human-readable binary encoding, BaseHangul for Ruby.

YousList `https://github.com/yous/YousList`
Block filter for advertisements, mainly on Korean sites.

aheui.vim `https://github.com/yous/aheui.vim`
Vim syntax highlighting for Aheui.

lime `https://github.com/yous/lime`
Simple standalone Zsh theme.

Raheui `https://github.com/yous/raheui`
Aheui interpreter in Ruby.

Themespace `https://github.com/themespace`
Show demo site of Octopress themes.

5.2 Contributing

Git `https://github.com/git/git`
Fix bash/zsh completion for paths containing spaces.

Pinpoint `https://github.com/naver/pinpoint`
Added Gson Plugin. Translated nodejs.org contents and reviewed others' translations.

just-news `https://github.com/disjukr/just-news`
Wrote parser for a number of news sites.

RuboCop `https://github.com/bbatsov/rubocop`
Added auto-correction for a number of cops.

whitespace `https://github.com/lucalsew/whitespace`
Improved the layout and added several social profiles.
